Présentation de l'éditeur

Scientist and theologian Sjoerd Bonting offers a new overarching framework for thinking about issues in religion and science. He looks at the creation controversy itself, including biblical perspectives, traditional doctrines, and the particular potential contribution of chaos theory. Finally, Bonting extends this perspective, a combination of chaos theory and chaos theology he calls "double-chaos," into a framework that addresses traditional questions about evil, divine agency, soteriology, the understanding of disease, possible extraterrestrial life, and the future.
